1511 Camachile Street, Caa,
Las Piñas City, NCR, Philippines
Zip: 1740

► Summary

A freelance web and game publisher, created 4 websites and 2 WebGL games with own original codes. One of the website receives 200 unique visitor/day with full SEO competitiveness.

► Job Objective

Be part of a competitive company, as a part of programming team or position related, that would feed my addiction to programming and learning about it.

► Skills:

- Programming (HTML, CSS, JS, C#, Reactjs, Solidity)
- Shopify, Wordpress
- Website optimization (SEO, image optimization, loading time minimization)
- Game engine (Unity)
- Typing skills (40 up to 50 WPM)

► Employment History:

Storytoken.app

06/2021 to present

Chief Operations Officer

Handles assigning of tasks to team members. Coordinating with Technical lead and flutter developer.

Technologies used:

PHP, HTML, CSS, JS, C#, Solidity, Slack, Telegram, WordPress

Safe-xi.com

04/2020 to 06/2021

Front end Developer

Handles front end technology used for website.

Technologies used:

HTML, CSS, JS, Telegram, WordPress

► Websites and Games created:

<https://storytoken.app>

- Created March 2022, this is an updated version of the website which was created June 2021
- This was the first website made for a cryptocurrency Bep20 based project called Story.
- All programs and pages in this website are manually coded using PHP JS CSS and HTML

<https://socialbridge.pro>

- Created May 2022, this is a website for one of my client who owns a marketing company called SocialBridge.
- All programs and pages in this website are manually coded using HTML CSS and JS. It has a built in messenger option from tawk.to that notifies my client for any inquiries when using the chat option on the site.

<https://aureus-token.com>

- Created October 2021, this website is for another cryptocurrency bep20 based project called Aureus token.
- All programs and pages in this website are manually coded using PHP JS CSS and HTML
- It has a separate page where I used wordpress for staking option and another page to play the game that I created on Unity with blockchain and NFT integration using chainsafe SDK.

<https://metazombietoken.com>

- Created June 2022, another website for a cryptocurrency bep20 based project called MetaZombie. This project has not launched yet.
- All programming including whitepaper, website and game are manually coded by me.
- It will have a separate page that I create for an FPS zombie NFT game on WebGL using unity.

► Programming Language Proficiency:

- JavaScript (Intermediate)
- HTML (Above Intermediate)
- CSS (Above Intermediate)
- C# (Intermediate)
- Solidity (Above Intermediate)
- PHP (Advance)

► Application known:

- Adobe Illustrator
- Wordpress
